OBJECTIVE

AI Engineer with production experience in agentic systems, RAG, and harness ecosystem. Seeking developer-oriented roles at AI-native organizations where I can design and ship scalable intelligent systems .

EXPERIENCE

AI Engineer Anyfeast

Feb 2025 - Present
London, UK (Remote)

- Leading AI engineering for a **real-time personalized meal kit Ai ecosystem** spanning 50+ dietary verticals including complex health constraints with validation and evals.
- Architected and scaled a complete **harness engineered recipe engine** with guardrails and validation layers, producing **130,000+** diverse recipes serving thousands of customers across UK and India.
- Led an 8-member team (engineering and doctors) to build a **agentic consultation system** grounded in verified nutrition data.

AI Engineer Intern Invest4Edu

May 2024 - Jan 2025
Hyderabad, IN

- Designed **ETL pipelines** for educational data scraping handling **10M+** records.
- Built RAG-based Q&A system over scraped educational content using open-source LLM fine-tuning; added in-house evals and observability with QA teams, achieving **78%** accuracy with refusal handling.

PROJECTS

Polly Harness ([GitHub](#)) | ([Live Demo](#)). 9-layer harness-engineered AI refund agent with safety metrics. Achieved **88.6%** pass rate on 229-case adversarial testing suite with **98.7%** injection resistance and **100%** jailbreak resistance.

UltraDoc Intelligence ([GitHub](#)) | ([Live Demo](#)). Hybrid RAG for logistics/TMS documents. With confidence scoring, guardrail pipeline and LLM-as-judge evaluation framework; that achieved **91.9%** Q&A accuracy with(**\$0.003/query**).
